

Name / Representation	Description / Graphical specifications
Condition 	Indicates a condition. In RUX-Model UiML extension is a <op> element. “COND” text is changed in the representation for “= =”, “!=”, “&&”, “ ”, “>”, “<” or CALL “name” depending on the type of <op> name attribute
UI Action 	Action that affect a property of the UI. “NAME” text is changed for the name of the component affected by the alteration of the UI and its affected property.
CALL Action 	Action that call the hypertext underlying business logic. “NAME” text is changed to display the name defined in the call element.
OCL Action 	Action that can be a single or multiple OCL sentences. “NAME” text is changed to display the name attribute of the OCL code.
Flow 	Indicates relations between elements. Three special types are available: when-true, when-false and by-default. All the flows provide their type over the arrow figure. A special flow arrow displayed with a cross line is used also to represent <by-default> condition when the arrow target is the same as when-true or when-false flows.
